

# MicroSD to High-Speed CF Reader/Adapter MSDCFA-C02

**C-Ming Technology** proudly presents you a perfect solution for converting the MicroSD to high-speed CF. MSDCFA-C02 is ready for SD 3.0 and can support the new exFAT file system. This adapter is also equipped with high-speed CF interface and the access rate is faster than any similar products ever.

MSDCFA-C02 supports converting microSD, microSDHC, and even the next generation SD 3.0 card with exFAT file system to Type I CF.

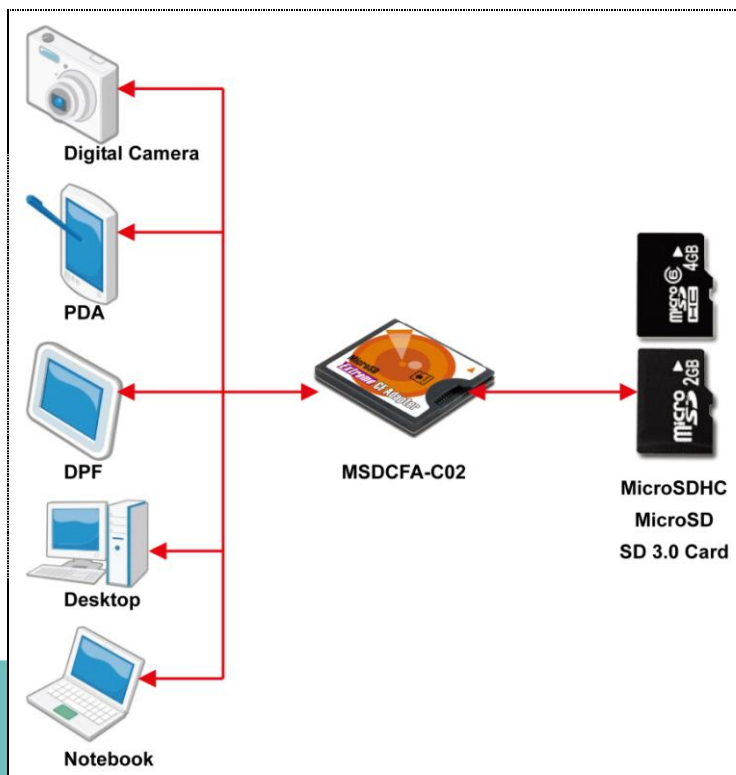

MSDCFA-C02 is equipped with high-speed CF interface; it can show the real speed of inserted media. Any similar products would always seriously slow down the access rate of inserted card. However, with MSDCFA-C02 this situation would never occur.

MSDCFA-C02 is very convenient for any digital device equipped with CF socket, like Digital Camera, DSLR, PDA, Digital Photo Frame, Card Reader, Notebook, etc. Get the real power of MicroSD card to your digital devices; just contact **C-Ming Technology** now!

## Features

- Compatible with SD system Spec 2.0.
- SD 3.0 ready; accept SD 3.0 card with exFAT file system.
- Supports MicroSD cards with various kinds of form factor, including microSDHC / microSD / TransFlash.
- Supports CF true IDE mode, memory mode, and I/O mode. IDE interface supports DMA mode and PIO mode.
- High-speed Type I CF interface with extreme performance.
- Equipped with push-push MicroSD socket for easy card insertion and extraction.

## Application Diagram

## Specifications

Input Socket	SD system Spec 2.0 compatible SD system Spec 3.0 ready
Output Interface	High-Speed Type I CompactFlash
Supporting Card	microSDHC 4GB~32GB / Class 1-10 microSD 8MB~2GB / Class 1-10 SD 3.0 Card > 32GB
Supporting OS	Windows / Mac OS / Linux
Safety Approval	CE / FCC
Dimensions	42.8 mm(L)* 36.4 mm(W)* 3.3 mm(H)
Weight	≈ 10g
